LIGHTING

Energy-Saving Lighting Solutions

Dew is into institutional marketing of energy saving lights since over a decade. We determine the appropriate lighting requirements for illuminating a space that uses as little electricity as possible. A combination of good, sensible lighting design with the use of the latest technology lighting systems can result in substantial energy savings and an overall improvement in lighting quality.

Lighting services offered by DEW include:

- Lighting audit of existing facility
- Redesigning of existing lighting layouts
- Designing of green field lighting projects
- Supply of LED lighting systems
